

Whole School Curriculum Provision Overview

Percy Hedley School is an all-age school for children and young people with a wide range of special educational needs & disabilities. We are dedicated to providing an ambitious, broad, rich, deep and aspirational curriculum at levels appropriate to the developmental understanding of our pupils. In considering the curriculum, it is underpinned by the school's Key Drivers: Communication, Wellbeing and Independence.

Our curriculum is designed to help our pupils to become

- Successful learners who are engaged in and enjoy their learning – making excellent progress and experiencing achievement
- Effective communicators who can express themselves, make choices and build positive relationships with other people and have increasing control and influence over their lives
- Confident individuals who having had a variety of successful experiences are able to take a full part in activities within school and the community. Also, to provide the appropriate level of challenge and risk taking in order to develop the resilience and aptitude necessary to be able to cope when things go wrong
- Active participants in developing a healthy, safe lifestyle, developing good relationships and respecting differences between people, developing positive mental and physical health, happiness and a sense of wellbeing
- Well-prepared for their adult life where they have increasing control and influence over their own lives and develop into young people who are as independent as possible

Whilst the overall aims of the curriculum will be the same for all children and young people attending Percy Hedley School, the styles of teaching and learning may be different according to the specific learning needs of the pupils.

The curriculum is highly personalised as each pupil has planned progressive steps in learning and individual targets based on their assessed previous knowledge and skills rather than for their age or year group. Due to the particular needs of an individual pupil, some pupils may not have an 'even profile of ability' across the curriculum and consequently rigorous assessment is key to identifying progressive steps in learning across the curriculum. The curriculum provides the opportunity for pupils to access broad and balanced learning at a differentiated level meeting statutory requirement.

Our curriculum, both in terms of the pathways and subjects, supports safeguarding whilst ensuring progress, and operates under the premise that they are essentially the same entity when we consider our ultimate aim, our mission, which is for our learners to have happy,

fulfilling lives as active and included citizens of our society, while they are with us and beyond; that they are well-prepared for adulthood, society and the world.

Curriculum Approach

Percy Hedley School has ambition for all children and young people and as such we strive to provide a meaningful, aspirational curriculum which is a framework for learning we deliver through a spiral approach.

The school's pedagogy involves this spiral approach wherein year-on-year knowledge and skills are revisited and built on to provide depth as learners master skills and apply these in functional situations. We base our approach on optimising pupil motivation to learn. Within this we acknowledge that progression is not necessarily about movement up a ladder of knowledge and skills. Lateral progression is important in being able to master the knowledge and skills that have been learned eg, in different contexts, situations, with less scaffolding and support, with different people and in different environments. Retention of fundamental knowledge and skills which embed into the long-term memory is important - to know more, do more and remember more.

This approach has three key principles

- Planning is cyclical - pupils return to topics throughout their time in school
- Increasing depth is planned each time a topic/theme/programme is revisited towards a mastery level
- Prior knowledge is utilised when a topic is revisited so pupils build on a strong foundation

Percy Hedley School has mapped curriculum provision by

- Providing this overview of the work we have planned in school, including our intentions, implementation of the specific areas of the curriculum, and the expected impact
- Developing three specific curriculum pathways including pre-formal (Learning Skills Through Engagement), semi-formal to formal (Experiential Language Topic Based Approach – ELTBA) and formal (Appropriate Accreditation). These pathways are not fixed for pupils, and pupils can and do move between them as appropriate and as indicated through robust assessment
- Collating overviews for each pathway/subject so teachers know what they are teaching and when
- Written progression documentation to ensure a sequential approach
- Teachers developing and delivering the curriculum through a topic/thematic approach or through planned programmes of work, utilised dependent on the age and needs of learners. Topics/Themes are mapped across each term and identified knowledge and skills are identified to ensure breadth in learning
- Ensuring pupils' progress through their curriculum is tracked and shared in order to ensure all further learning is sequential and builds on prior knowledge and skills attained

- Teachers explicitly include safeguarding in their planning and clearly record where and when they deliver particular aspects of safeguarding. This means that safeguarding is embedded in our curriculum, and that our curriculum promotes safety in all its forms.

Cultural Capital – What does this mean at Percy Hedley School?

Every child and family who joins our setting will have their own knowledge and experiences that will link to their culture and wider family. This might include: languages, beliefs, traditions, cultural and family heritage, interests, travel and work.

Cultural Capital is the accumulation of knowledge, behaviours, and skills that a child can draw upon and which demonstrates their cultural awareness, knowledge and competence; it is one of the key ingredients a pupil will draw on to be successful in society, their career and the world of work. Cultural Capital gives power. It helps children achieve goals, become successful, and rise up the social ladder without necessarily having wealth or financial capital. Cultural Capital is having assets that give children the desire to aspire and achieve social mobility whatever their starting point.

Our understanding of 'knowledge and cultural capital' is derived from the following wording in the National Curriculum: *'It is the essential knowledge that pupils need to be educated citizens, introducing them to the best that has been thought and said and helping to engender an appreciation of human creativity and achievement'*.

At Percy Hedley School, children benefit from a curriculum that builds on what they understand and know already. Through our Curriculum Design, their experiences revolve around the coherent cycle of learning from the past, living in the present and looking to the future. This means our children have a deep and connected knowledge and understanding of where they came from, who they are and what they might become. We believe that exposure, not only to culture but also to situations in which the children might not have previous experiences of, is of paramount importance to their ongoing successes.

Gradually widening children's experiences as they progress through our school is an important step in providing rich and engaging learning across the curriculum in order to ensure that children become productive members of society.

"Remember to look up at the stars and not down at your feet. Try to make sense of what you see and wonder about what makes the universe exist. Be curious. And however difficult life may seem, there is always something you can do and succeed at. It matters that you don't just give up."

Stephen Hawking

Curriculum Pathways at Percy Hedley School

We have three curriculum pathways

- Pre-formal – Learning Skills through Engagement
- Semi-formal to formal – Experiential Language Topic Based Approach
- Formal – Appropriate Accreditation

In order to ensure the curriculum pathway and class group are well matched to the pupil's needs a number of influencing factors are considered when determining the most appropriate curriculum pathway and class group. These include the cognitive stage, age, and social and emotional needs of our pupils. Pupils are re-grouped every September, or indeed earlier if required, based on thorough assessment and teachers' knowledge and understanding of the pupils; this ensures the most appropriate class groups are formed and allows the curriculum to be delivered most effectively to pupils with similar profiles.

Pre-formal (Learning Skills Through Engagement – Key Stage 1 to Key Stage 5)

- Learners may have profound and complex needs, a severe learning difficulty and/or medical condition, sensory impairment and/or physical disability. They will be learning at an early developmental stage and will require a high level of adult support to meet their educational and personal care needs; often 1:1
- Young people become secure in their environment in a way that is meaningful and purposeful to them. The focus is on enabling them to establish positive interactive relationships with others, to proactively explore the world around them and to gain environmental control skills. All pupils will be given maximum opportunities to achieve the highest level of independence possible
- Pupils do not access subject specific learning within the Learning Skills Through Engagement Pathway, as appropriate for their stage of learning and as outlined by the DfE within the Engagement Model. Pupils follow a curriculum which focuses on the pre-requisite skills and exposure to knowledge required to further learning in readiness, if applicable, for progression on to a semi-formal curriculum pathway
- While many children within the Learning Skills Through Engagement Pathway remain within the same pathway for the duration of their time in school, those children who demonstrate their readiness for subject specific learning move on to a semi-formal pathway as their curriculum needs change. Those remaining on the Learning Skills Through Engagement Pathway as they transition into Key Stage 4 begin to access Awards in recognition of their achievements. There is a continued focus on independence and preparation for adulthood as pupils move through Key Stage 5
- The curriculum is mapped to include an overlap on to the semi-formal curriculum to ensure a continuous transition between curriculum pathways where appropriate
- On-going assessment indicates whether a change of curriculum pathway is appropriate

- Pupils' progress through their curriculum is tracked and shared as they progress through school ensuring skills and knowledge are revisited and built upon appropriately as indicated through the Pupil Passport

Semi-formal (Experiential, Language, Topic Based Approach [ELTBA] – Key Stage 1 to Yr8 - Phase 5 - 8)

- These learners will have significant learning difficulties/disability and or physical disabilities. They may have difficulties with sensory processing, communication and self-help skills. These learners are likely to need additional support to access all aspects of the curriculum
- Pupils will learn most effectively when what they are learning about is tangible and real to them. They will learn best when learning is related to their own experience. Structured play, topic-based work and a focus on generalising their knowledge, skills and understanding is important
- Pupils access subject specific learning through a topic-based approach at a pre-National Curriculum stage
- Many pupils have an uneven profile with particular areas of splinter skills and knowledge. An individualised ambitious curriculum, where learning can be targeted at the appropriate stage, is necessary to ensure pupils achieve to their potential

Semi-formal to Formal (ELTBA – Key Stage 1 to Yr8 - Phase 9 - 15)

- These learners access the National Curriculum which is adapted in line with their developmental stage. The teaching sessions are more 'formal' and are taught in a structured way drawing upon pupils' speaking, listening and communication skills
- While still needing a high degree of practical and functional based work these pupils are able to learn about more abstract concepts seen through a National Curriculum 'lens'
- Life skills and independence skills will also form a large part of the curriculum. A high level of structure and first-hand experience is required to achieve success
- Teachers ensure that learning is linked to practical activities and consolidated and applied in practical sessions
- Our curriculum intends to respect and reflect the National Curriculum in its entirety and is contextualised to our unique school community

Formal (Appropriate Accreditation – Y9 – Key Stage 5)

- Pupils assessed stage at Year 9 indicates the appropriate curriculum route that pupils will follow in the Appropriate Accreditation Pathway. These routes are not set; ongoing assessment indicates whether the pupil requires an alternative curriculum route and subsequent accreditation as the pupil progresses
- There are a number of routes available ranging from Willow (Informal Awards and Life Skills), Cedar (Entry Level 1), Pine (Entry Level 2), Hazel (Entry Level 3), Maple (Level 1), Oak (Level 2/GCSE)

- Pupils' prior learning and acquisition of knowledge and skills is tracked and shared through the Pupil Passport ensuring the transition from lower to upper school continues to build upon the sequence of knowledge and skills as mapped

Independence/Preparation for Adulthood (PfA)

- In line with our school's Key Drivers, the importance of independence is recognised and prioritised. A focus on independence begins at the very earliest stages of a pupil's learning journey at Percy Hedley School and continues throughout their school career as they prepare for adulthood and their next steps
- Independence/preparation for adulthood varies in its nature across the three curriculum pathways and is specific to the individual needs of the child/young person
- For our younger cohorts (up to Yr7) a focus on the pupil's readiness for school, early steps towards independence regarding self-care tasks and steps towards independent learning, as appropriate, forms the focus
- As children move into Yr7 and beyond preparation for adulthood becomes more formalised and includes; focused employability sessions, careers guidance (CEIAG), impartial careers and transitions advice from Connexions within North Tyneside Council and widening experiences/encounters
- From Yr9, where appropriate, pupils have explicit weekly Employability sessions and their progress is tracked through the PfA outcomes. Additional support is given through impartial career interviews, college visits and work experience opportunities as appropriate. Other options such as Sky Sports Leaders or the Duke of Edinburgh Award also enhance and personalise student experiences alongside their options choices within post-16. PfA at Percy Hedley School is designed to meet the individual needs of all the learners and is reviewed regularly to match pupils' needs, strengths, and interests
- The four areas in Preparation for Adulthood: education and employment, independent living, community inclusion and good health & emotional wellbeing are a particular focus for all pupils within PfA
- Independence/PfA seeks to achieve coherent progression alongside the three Pathways in school, and centres on pupil views and personal choices, which are reflected in the curriculum, targets, and personalised timetables
- Our aim is to provide all our learners with a range of qualifications and skills that meet their different needs, reflect their interests, and prepare them for adult life, their next steps and lifelong learning
- As pupils approach the end of their time at Percy Hedley School they have the opportunity to be involved in their transition planning; this includes impartial college and/or social care visits to enable pupils and families to make informed decisions about their future

Curriculum Overview

Percy Hedley School will provide an ambitious curriculum designed to equip all children and young people with sufficient skills, knowledge and experiences (Cultural Capital) to function within daily life with optimal independence, health and wellbeing, and the ability to communicate to their optimal level in order to make choices, enjoy positive relationships and remain safe.

Through an in-depth understanding of each child's needs (cognition and learning; communication and interaction; social and emotional mental health, and physical and sensory), we set personalised and ambitious learning outcomes as the foundation for tailor-made curricular activities.

Our intention is for the curriculum to provide ambitious stretch and progression for all learners with an understanding that each child is on their own bespoke journey and will progress at a different rate and trajectory. We are determined to ensure the same inclusive ambition for all pupils regardless of background or starting point.

Assessment

In order to meet the needs of a range of pupils with complex needs, there are a number of assessment systems in place to monitor and analyse pupil progress from their individual starting points.

A holistic view is taken to track progress of our pupils. This can be demonstrated through achievements in the following areas as captured through 'The Wheel' – a holistic and inclusive system for summatively measuring pupil progress in the following areas

- Therapy
- EHC Outcomes
- Curriculum Pathways
- Wellbeing
- Case studies
- Key Drivers including parental feedback
- Awards/Accreditation
- Destinations & Next Steps

Assessment data is used to inform future planning and to indicate necessary interventions for those pupils who may not have made expected progress.

Within the three curriculum pathways, specific assessment criteria are used to track and monitor the progress of pupils dependent on the pathway they follow.

Pre-formal - Learning Skills Through Engagement

- The pre-formal curriculum forms a strong foundation for learning, built upon a pedagogy where real understanding is assessed before pupils advance to a semi-formal curriculum, if appropriate
- On-going assessment and tracking ensure pupils continue to build upon skills and exposure to the necessary knowledge required for further learning
- Pupil Passports containing curriculum coverage and pupils' assessed stages against the 'Assessment for All' framework ensures all transitions across school are fully supported and learning is sequenced appropriately. The necessary information 'travels' with the pupil across their learning journey throughout their time at PHS and is updated regularly to ensure it provides an accurate reflection of the pupil's learning journey to date

ELTBA

- The semi-formal pathway at Phase 5 - 8 follows pre-National Curriculum expectations. This allows pupils to build the prerequisite skills needed to access National Curriculum learning through the achievable steps of the Phase 9 - 15 curriculum. Highly effective transition through the use of Pupil Passports ensures continued progression
- In the semi-formal pathway we aim for pupils to transition to a more formal approach (in a specific subject area or whole curriculum) through Phase 9 -15 where pupils access a content which is rich in the knowledge and skills required for further learning. This prepares pupils with the appropriate knowledge and skills for their continued learning journey into upper school during their Yr9 transition year. Again, Pupil Passports indicating curriculum coverage and assessed stages of learning ensure pupils are prepared well for future learning. Knowledge and skills that pupils have acquired to date are further built on through the most appropriate route from Yr9 onwards as pupils transition on to the appropriate accreditation pathway

Appropriate Accreditation

- In the formal 'Appropriate Accreditation' pathway, pupils access a number of curriculum routes dependent on their assessed stage. This prepares pupils to access appropriate accreditations
- The pupils' assessed level at Yr9 indicates the most appropriate route. This is not set and pupils can progress to alternative routes depending on their progress
- Pupil passports indicating curriculum coverage and assessed stages against accreditation criteria ensure pupils are prepared well for future learning and the knowledge and skills that pupils have acquired to date are further built on through the most appropriate route

At all points in a pupil's curriculum journey Percy Hedley School has a highly ambitious approach to optimise pupils' ability to learn, apply knowledge and skills in functional situations. This epitomises Percy Hedley School's ambitious approach to learners' ability to developing their full potential.

Impact of Percy Hedley's approach to the curriculum

The aspiration for all pupils who attend Percy Hedley School is that they achieve their potential in all aspects of their development. The outcome of the curriculum is highly individual. All achievement and progress is celebrated.

All of our 2022 cohort have moved on to their 1st choice destination. This is indicative of the ambition held for all pupils.
